Stay Safe from
Phishing Scams

Keep your banking account safe from phishing# by activating your Digital Token today!

#Phishing is a method which cybercriminals use to trick victims into giving out their personal and financial information such as passwords, One-Time Password (OTPs) or bank account numbers.

Why Activate your Digital Token?

- Cybercriminals are getting smarter at tricking victims into revealing their One-Time Password* (OTP) to carry out unauthorised transactions.

- A Digital Token authenticates your login without the need for an OTP, making it much harder for cybercriminals to access your account without your authorisation on your mobile device.

*OTP is an automatically generated string of numbers or characters sent to a user for authenticating a single login or transaction.

Steps to Activate Digital Token
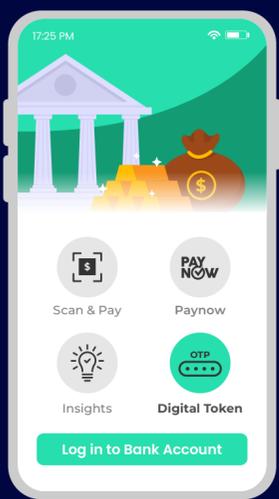

Step 01

Launch your bank app: Open your bank app and tap on 'Digital Token'
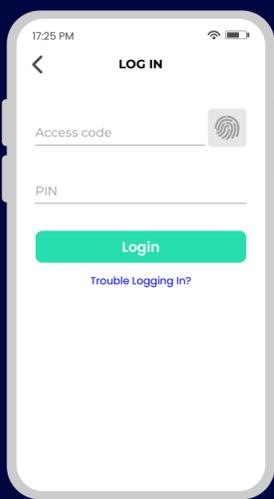

Step 02

Log In: Enter your User ID/Pin or authenticate with biometrics
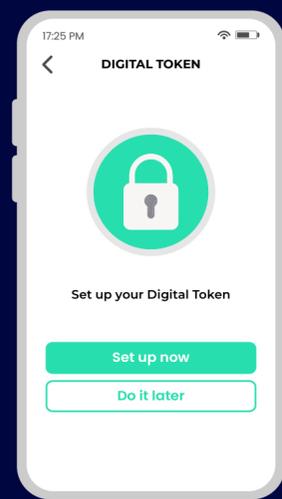

Step 03

Set Up: Tap on the 'Set up now' button, and follow the on-screen prompts

Tips to Be Cyber Safe

- **Verify the transactions** that you are authenticating. If it is not made by you, click 'Reject'.

- **Update your banking apps promptly.** These software updates contain important security fixes that help keep your devices safe from cybercriminals.

- **Never share your personal and banking information** with anyone.

Need Help?

Customer Support: Contact the bank's customer service team for assistance.
